# Flight Details

I designed the search and selection views to match as closely to the default experience as I could. Departure and gate information were included to help the user make the right choice while also informing them of how much time they have available to place an order.

Flight Details

I wanted to make sure that the frequent flyer persona had the ability to plan ahead, so I added the ability to order for their arrival. This way, the food could be ready for them when they step off the airplane.
